ORTHON

Innovations

GENERAL CATALOGUE

At **ORTHON,** we believe that movement is the very foundation of wellness and a fulfilling life. And so – driven by meaningful innovation, a desire to share our expertise and a supportive, caring touch – we are dedicated to providing patients around the world with a lifetime of movement solutions.

ORTHOPAEDIC AND MEDICAL DEVICES

INTRODUCTION

Orthopedic implant occupies a special and vital position in both clinical applications and biomedical industry. In 2016, the orthopedic device market in the United States has reached 15.8 billion USD, while this value was 6.1 billion in Asia. The global orthopedic device market value is estimated to reach 45.0 billion USD by 2020. Be-sides, the global orthopedic trauma devices, such as plates, screws and external fixators, have possessed a market of 5.7 billion in 2013, which was forecasted to have a highest compound annual growth rate of 7.2% until 2020.Orthopaedic implants could be categorized into the following four main applications, including joint replacement, spinal implants, orthobiologics and trauma implants. Those different types of the orthopedic implants are basically derived from nearly all the clinical needs and developed with an extraordinary speed. Orthopedic implants are Class III medical devices that shall be well-designed, tested and developed based on specific clinical indications to realize their expected functions within body. ORTHON mainly focused on the internal implants manufacturing keeping in view day by day requirements of the surgeons all over the world. ORTHON keeps on evaluating its manufacturing process and not making any compromise in quality of manufacturing and composition of metal alloys. ORTHON has moto of keep on moving, mobility is life and sense of well-being.
