## *INNOVATIONS*

### SPINAL FUSION CAGES AND SPACERS

---

Your patients deserve best in class products delivered by people who care. ORTHON comprehensive portfolio features rigid bone fixation.

#### **ORTHON**

PAKISTAN IS KNOWN SINCE YEARS FOR MANUFACTURING AND EXPORTING SURGICAL GOODS ALL AROUND THE WORLD. THE QUALITY AND PERFECTION HAVE NO MATCH.

# INTRODUCTION

Car accidents, falls and sports injuries are examples of trauma that can cause spine fractures.

Spine fractures caused by trauma – such as a sudden blow or injury to the vertebrae – can occur anywhere on the spine, including bones in the neck or cervical spine, bones in the upper back or thoracic spine, the lower back or lumbar spine, and the section of connected bone at the very bottom of the spinal column called the sacrum.

## APPROACH

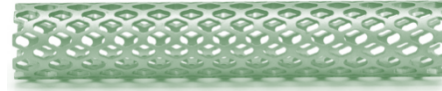

ORTHON is dedicated to evaluating and treating spinal conditions, including injuries of the spinal cord, vertebrae and nearby nerves. Caring for severely injured patients often requires expertise in skeletal fixation, soft tissue repair, intensive care management and rehabilitation. To provide each patient with the best care possible, ORTHON has variety of implants.

*The variety of implants are made up of Titanium, keeping in view the requirements of the future ORTHON in working on Bio Absorbable materials and in near future plan to add new technologies in the field.*
